CDIS Skill1

User details

User name

student1

The user name can have up to 64 characters. Valid characters: A-Z, a-z, 0-9, and + = , . @ _ - (hyphen)

☑ Provide user access to the AWS Management Console - *optional*
In addition to console access, users with SignInLocalDevelopmentAccess permissions can use the same console credentials for programmatic access without the need for access keys.

Console password

○ Autogenerated password
You can view the password after you create the user.

◉ Custom password
Enter a custom password for the user.

••••••••••••

- Must be at least 8 characters long
- Must include at least three of the following mix of character types: uppercase letters (A-Z), lowercase letters (a-z), numbers (0-9), and symbols ! @ # $ % ^ & * ( ) _ + - (hyphen) = [ ] { } | '

☐ Show password

☐ Users must create a new password at next sign-in - Recommended
Users automatically get the IAMUserChangePassword policy to allow them to change their own password.

ⓘ If you are creating programmatic access through access keys or service-specific credentials for AWS CodeCommit or Amazon Keyspaces, you can generate them after you create this IAM user. Learn more

Permissions options

○ Add user to group
Add user to an existing group, or create a new group. We recommend using groups to manage user permissions by job function.

○ Copy permissions
Copy all group memberships, attached managed policies, and inline policies from an existing user.

◉ Attach policies directly
Attach a managed policy directly to a user. As a best practice, we recommend attaching policies to a group instead. Then, add the user to the appropriate group.

Permissions policies (1/1601)

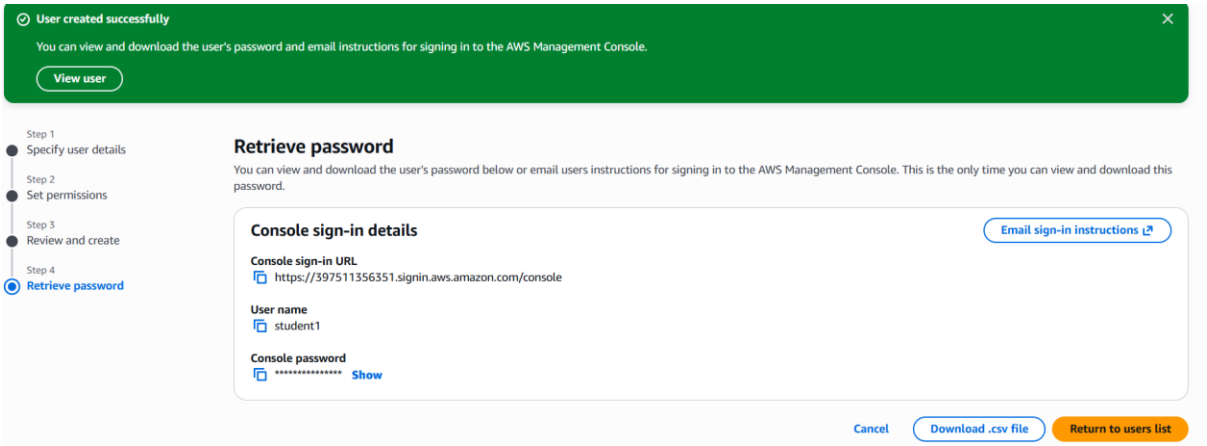

Choose one or more policies to attach to your new user.

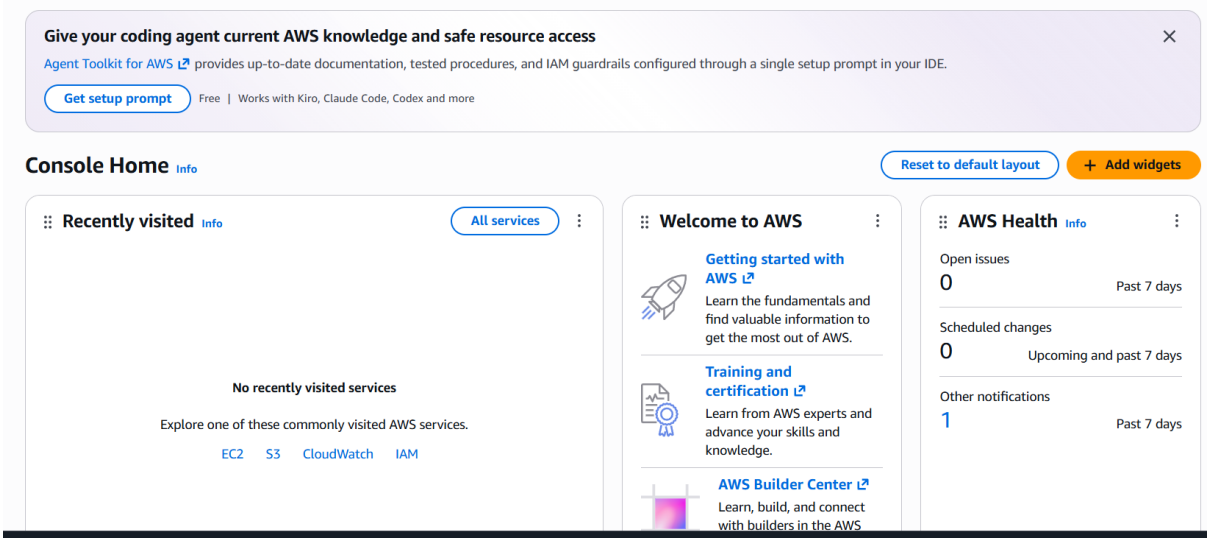

Create policy

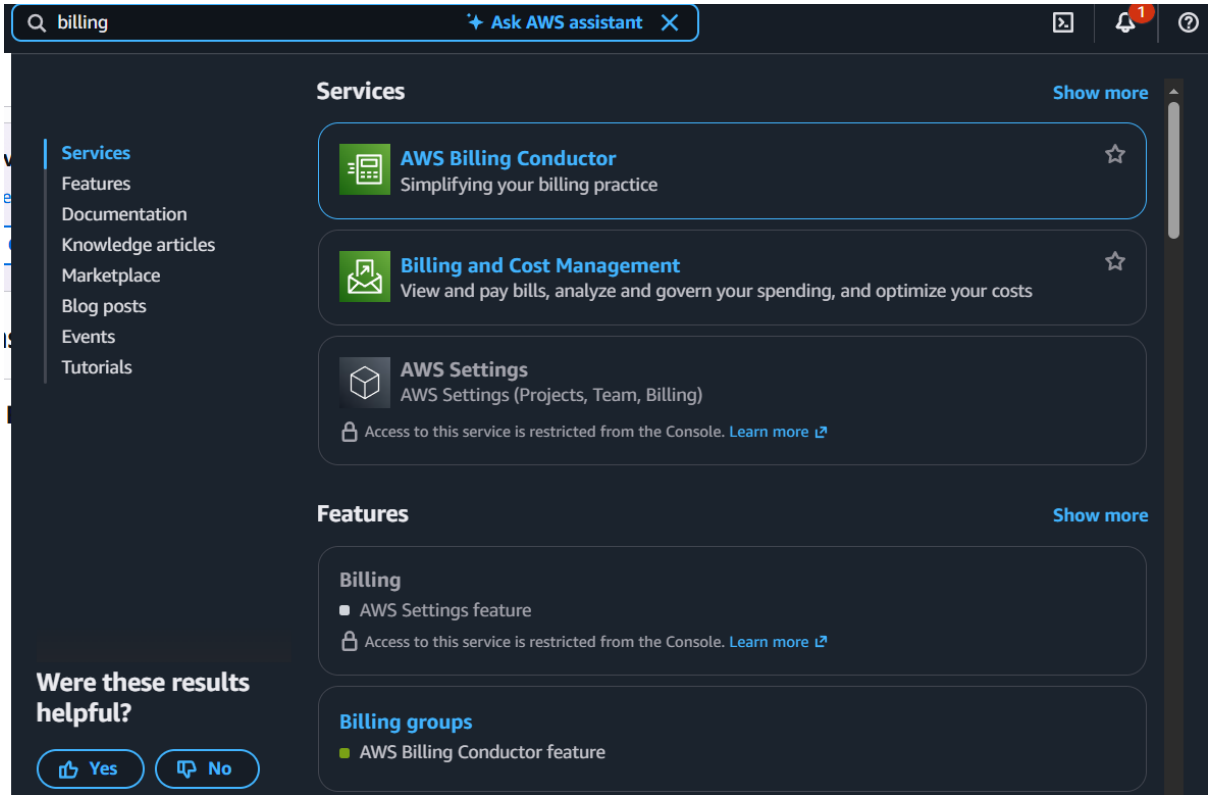

Filter by Type

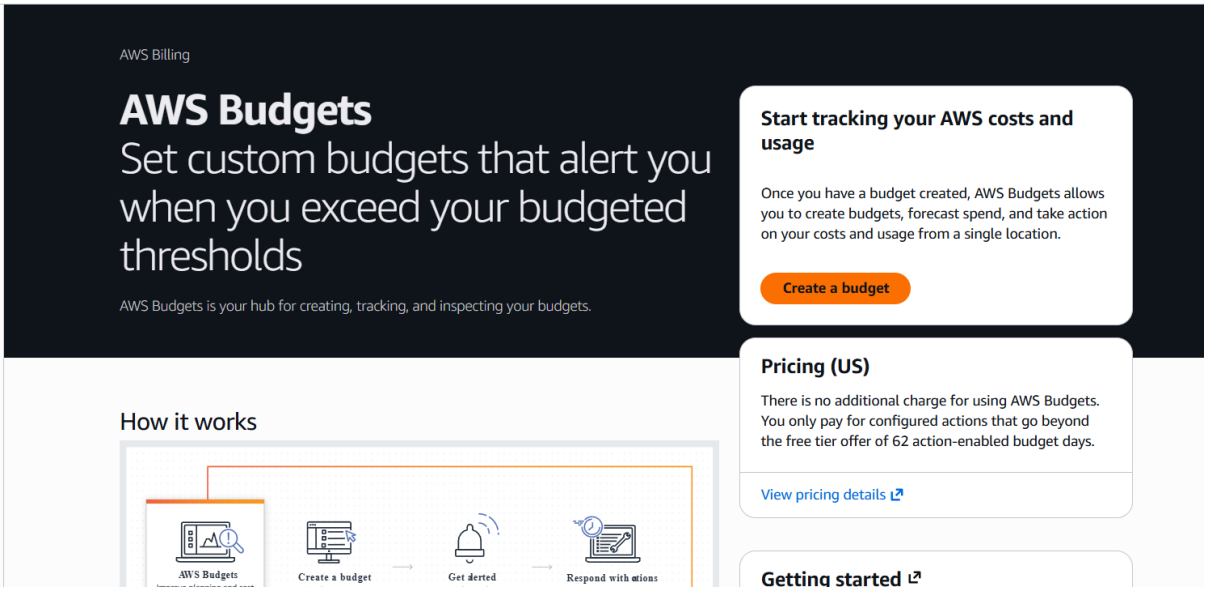

Search | All types | 1 2 3 4 5 6 7 ... 81

Policy name	Type	Attached entities

AWS Billing
AWS Budgets
Set custom budgets that alert you when you exceed your budgeted thresholds
AWS Budgets is your hub for creating, tracking, and inspecting your budgets.
Start tracking your AWS costs and usage
Once you have a budget created, AWS Budgets allows you to create budgets, forecast spend, and take action on your costs and usage from a single location.
Create a budget
Pricing (US)
There is no additional charge for using AWS Budgets. You only pay for configured actions that go beyond the free tier offer of 62 action-enabled budget days.
View pricing details
How it works
Getting started

○ Use a template (simplified)
Use the recommended configurations. You can change some configuration options after the budget is created.

◉ Customize (advanced)
Customize a budget to set parameters specific to your use case. You can customize the time period, the start month, and specific accounts.

▶ **Billing View - *optional***
Select a billing view you want to create this data export for. This will not be editable after create. If no view is selected, this export will be created for your account data (primary view).

Budget types

◉ Cost budget - Recommended
Monitor your costs against a specified dollar amount and receive alerts when your user-defined thresholds are met. Using cost budgets, the budgeted amount you set represents your expected cloud spend. For example, you can set a cost budget for a business unit and then add additional parameters such as the associated member accounts.

○ Usage budget
Monitor your usage of one or more specified usage types or usage type groups and receive alerts when your user-defined thresholds are met. Using usage budgets, the budgeted amount represents your expected usage. For example, you can use a usage budget to monitor the usage of certain services such as Amazon EC2 and Amazon S3.

○ Savings Plans budget
Track the utilization or coverage associated with your Savings Plans and receive alerts when your percentage drops below a threshold you define. Setting a coverage target lets you see how much of your instance usage is covered by Savings Plans, while setting a utilization target lets you see if your Savings Plans are unused or underutilized.

Details

Budget name

Provide a descriptive name for this budget.

zero_budget

Names must be between 1-100 characters.

Set budget amount

Period | Info

Monthly

Budget renewal type

- (•) Recurring budget
  Recurring budgets renew on the first day of every monthly billing period.
- ( ) Expiring budget
  Expiring monthly budgets stop renewing at the end of the selected expiration month.
